

Day 14: BreakFast

Write a function that accepts an array of 10 integers (between 0 and 9), that returns a string of those numbers in the form of a phone number.

Examples

Input => [1, 2, 3, 4, 5, 6, 7, 8, 9, 0]

Output => "(123) 456-7890"

semicolon
