

Day 18: BreakFast

Given a set of numbers, return the additive inverse of each. Each positive becomes negatives, and the negatives become positives.

Examples

Input => [1, -2, 3, -4, 5]

Output => [-1, 2, -3, 4, -5]

Input => [1, 2, 3, 4, 5]

Output => [-1, -2, -3, -4, -5]
