

Day 09: BreakFast

Make a program that filters a list of strings and returns a list with only your friends name in it.

If a name has exactly 4 letters in it, you can be sure that it has to be a friend of yours! Otherwise, you can be sure he's not...

Examples

Input => ["Ryan", "Kieran", "Jason", "Yous"]

Output => ["Ryan", "Yous"]

Input => ["Peter", "Stephen", "Joe"]

Output => []

semicolon
