

FIRE DRILL

LOOK HOW FAR WE'VE COME

semicolon

Ground Rules

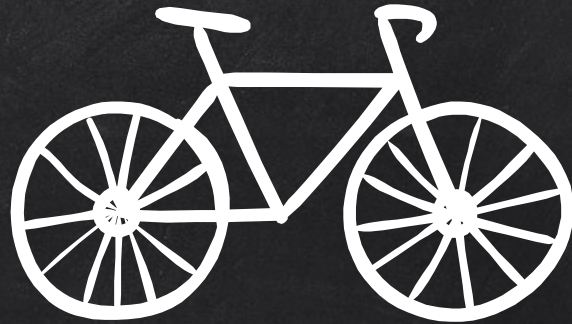

1. It is not a group work, Any form of collaboration will have consequences
2. Only things learnt from chapter 1 – 5 is needed for these tasks, Please do not use arrays for these tasks
3. For every new task, create a new java class file, copy the code from the previous task, and modify it to meet the requirement
4. You are not allowed to skip any question
5. All class files should be named according to the task number, so task one should be named TaskOne.

semicolon

1. Print 1 – 10 using a loop.
2. Print even numbers between 1 – 10 using a loop.
3. Print odd numbers between 1 – 10 using a loop.
4. Print multiples of 4 between 1 to 10 (4 8).
5. Print each result from TaskFour, 5 times each (44444 88888).
6. Print the 5 multiples of each of the result from TaskFour (4 16 64 256 1024 8 64 512 4096 32768).
7. sum the pairs from TaskSix together (1364 37448).
8. Sum the pairs from TaskSeven together (38812).
9. print the square of result from TaskSeven(1506371344).

semicolon

THANKS!

Hope that was fun?
